Art Unit: 2821

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-29 are, drawn to a monopole antenna, classified in class 343, subclass 702.
 - II. Claims 30-32 are, drawn to a wireless communications device, classified in class 455, subclass 90.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions II and I are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because the claimed limitations in claims 30-32 merely a lap top device without the specificity of the monopole antenna structure. The subcombination has separate utility such as the monopole antenna of claims 1-29 can be used for a different wireless device, not a laptop.
3. Because these inventions are independent or distinct for the reasons given above and have acquired a separate status in the art in view of their different classification, restriction for examination purposes as indicated is proper.
4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to HoangAnh T. Le whose telephone number is (571) 272-1823. The examiner can normally be reached on 8:00am-4:30pm.
